The Syndicate and its mutant bosses stand in the way of Grave, and pale humanoid creatures attack Grave with superhuman strength! Can you discover the relationship between Harry, the big boss of the Syndicate, and Grave and expose the mysterious girl?!!

In a colossal city of strataums uniting the sky and the earth, you will see Death in human form howl!

HOW TO PLAY

PURPOSE

You, as **BEYOND THE GRAVE**, have to proceed in the game by battling against members of the Syndicate.

You must defeat enemies one after another, using both your guns as well as the coffin on your back. As you progress, “GO!” will be displayed onscreen to indicate the direction you should head.

The “TARGET” sign will be displayed when a key enemy such as a boss appears. Defeat the target in each stage to clear the stage and proceed.

GAME OVER

The game will be over when the Life Gauge displayed in the top right of the screen drops to 0.

The Life Gauge drops when Grave is attacked with the Shield Gauge at 0, or if he’s damaged by a bomb blast or exploding objects.

DEMOLOITION SHOT COUNTER

This counter shows how many Demolition Shots you have left. It can store up to 9 shots (Refer to P.12).

DEMOLOITION SHOT GAUGE

This gauge increases when the Beat Count reaches a certain amount. If this gauge is full, you will receive more Demolition Shots (Refer to P.12).

DEMOLITION SHOT ICON

This icon displays the type of Demolition Shot currently selected.

TARGET MARKER

This marks a key enemy or target you must defeat in order to proceed to the next stage. If no targets are on the screen, a “GO!” sign indicating where to go should appear.

SCORE

The current score. The score goes up by defeating enemies or destroying objects.

LIFE GAUGE

This gauge shows the physical strength of Grave. If it drops to 0, the game will be over.

SHIELD GAUGE

This gauge shows Grave’s defensive power and it drops when he is attacked. If the Shield Gauge drops to zero, the Life Gauge will begin to drop. The Shield Gauge will replenish when Grave is not being attacked.

BEAT COUNT

This count goes up if you attack enemies or hit destroyable objects in rapid succession. When the count reaches a certain point, the Demolition Shot Gauge goes up (Refer to P.12).
The Demolition Shot is a special technique using a powerful weapon hidden in a coffin on Grave’s back. Press the Demolition Shot button (△ button) to launch a shot when there is at least 1 charge shown on the Demolition Shot counter.

Number of times to use DEMOLITION SHOT

You can use the Demolition Shot only a limited number of times. The number of times you can use the Demolition Shot is shown on the top left of the screen. The number of Demolition Shot charges increases as the Beat Count is built up.

BEAT COUNT

Beat Count is a number displayed on the top right of the screen every time you hit objects. As you hit enemies or destroyable objects, the number increases. However, if a blaze around the skull disappears, the Beat Count returns to zero.

If the Beat Count builds up to a certain number, the Demolition Gauge at the top left of the screen fills up. The more the Demolition Gauge fills up, the more times you can use Demolition Shot. To get as many Demolition Shots as possible, keep the Beat Count increasing continuously.

The higher the Beat Count gets, the faster the Demolition Gauge builds up. Gain the advantage by shooting enemies and objects to keep the Beat Count going.

TYPES OF DEMOLITION SHOT

Choose a Demolition Shot from various types within the DEMOLITION SHOT Menu that is displayed by pressing the START button during gameplay. The type of Demolition Shot selected is shown at the top left of the screen as an icon and can be used by pressing the△ button (by default).

DEATH BLOW

Fires a rocket bomb forwards, causing big damage to enemies!

BULLET DANCE

Fires a machine gun rapidly while spinning, causing damage to all nearby enemies!

RECOVER LIFE NOW

Restore the Life Gauge by using the Demolition Shot Counter. Choose “RECOVER LIFE NOW” to restore the Life Gauge within DEMOLITION SHOT on the Pause Screen.

As you receive more skulls after clearing stages, more Demolition Shots will become available.
As you proceed through the game, you will confront various bosses of the Syndicate. In each battle against a boss, the battle will be one-on-one. Defeat the boss to clear the stage! The Life Gauge of the boss will be displayed in the bottom left of the screen.

After defeating the boss at the end of the stage, check out your stage score on the RESULTS Screen. The more skulls you see in each item, the better your score is. You can get up to 5 skulls per item.

The skulls obtained per stage will be accumulated, and when enough are accumulated, a new Demolition Shot will become available.

---

**COLUMN**

**DEMOLITION SHOT** specially designed for Boss Battles

After damaging the boss a certain amount, you will see a skull surrounded by blue flame in the center of the DEMOLITION SHOT Gauge. When you see this blue flame, press the Demolition Shot button (A button) to use a super technique specially designed for boss battles.

---

| **BEAT COUNT** | Displays the best Beat Count score on this stage. |
| **KILL RATE**  | Displays the rate of defeating enemies on this stage. |
| **CLEAR TIME** | Displays the time it took to clear this stage. |
| **REMAIN LIFE** | Displays the remaining life when this stage was cleared. |
| **ARTISTIC BONUS** | Displays how cool you were in defeating enemies. |
Techniques of Shooting

There are two main techniques for shooting. The first is called Burst Mode: while standing still, press the button rapidly to begin a burst. There is a lot of power here against groups of enemies, but it is more difficult to move. The other method is shooting while walking, or walking quickly. This method allows you to target enemies on all sides more easily.

Use the coffin to your advantage!

You can use the coffin Grave is carrying on his back to defeat enemies around you. Swing the coffin around only once to attack normal-sized enemies, and to defeat big-sized enemies, swing it twice. If you have defensive power to spare, approach enemies while shooting and when the enemies surround you, use the coffin to attack them all.

Lock On & Parallel Move

If several enemies are in the distance, use the Lock On. By using Lock On you can accurately shoot enemies and raise the Beat Count continuously. Press the L1 button and tap the button to defeat individual enemies rather than firing continuously.

BEAT

To do well, save as many Demolition Shots as possible! For example, in an unfavorable situation you can pause the game with the START button and consider how to fight back. Raise the Beat Count and save Demolition Shots. Figure out patterns of how enemies appear as well as locations of destroyable objects to raise the Beat Count continually, and keep the flame behind the BEAT COUNT blazing.

Shoot with style!

As mentioned on P.15, the ARTISTIC BONUS displayed on the Result Screen after clearing a stage shows how well you have defeated enemies. To get as many skulls as possible, follow the tips below.

- Shoot enemies close by.
- Jump and shoot enemies.
- Shoot enemies when you are just about to turn around.
- Shoot enemies using a special technique.
- Make a stylish pose.

Good-looking shots or attacks add more points to the ARTISTIC BONUS. Note that unfavorable attacks such as shooting enemies from a distance deduct points. Find the best way to defeat enemies!

FADE AWAY SHOT

When you shoot while jumping from stairs or overhead locations, press and hold the button to perform a Full-Automatic shot. Also try this while diving to the side, or jumping backwards.
**BEYOND THE GRAVE**

CV: N/A

The hero of this story. A killer called "DEATH" and feared by the Syndicate. Grave carries huge twin guns called "CERBEROS" in both hands and a coffin full of heavy armaments on his back.

**CERBEROS**

Huge twin guns left to Mika. The story behind how these guns were made and how they were brought back is unknown.

**COFFIN**

The coffin Grave carries on his back is full of heavy armaments.
**MIKA ASAGI**

CV: Tomoko Kawakami

A heroine in the story, and also the daughter of a woman Grave used to be in love with. Managed to run away from the Syndicate, and is having Grave eliminate Harry with the Cerberos. Despite her girlish looks, Mika has a strong will.

**DR. T**

CV: Motomu Kiyokawa

The only person Grave can seek for help, Dr. T brought Grave back to life and made him invulnerable. Together with Grave, Dr. T escaped the Syndicate and went into hiding in a town lying on the bottom stratum. It can only be assumed that he was a member of the Syndicate, but hardly anything is known about Dr. T or his possible relations with the Syndicate. Usually this old man remains silent, however, ever since he met Mika, he has begun to change and has started to reveal more about his past.

**HARRY MACDOWELL**

Used to be one of the key men bolstering the Syndicate with Grave, but after the disappearance of Big Daddy, he moved up to be a new boss. Also as an avatar aiming for the top since Big Daddy was leading the Syndicate, Harry is so merciless that he is seeking even the life of Grave who used to be his protégé.

**MARIA ASAGI**

A woman Grave used to love, and wife of Big Daddy and mother of Mika. Her power makes it hard to believe any of the hard times Maria went through to move up from a poor life. It can be said Mika got her strong will from her mother. Maria gave the Cerberos to Mika to get Grave to kill Harry. Whether Maria is alive or dead is unknown.

**BIG DADDY**

The former boss of the Syndicate. Despite his lifestyle of living in the dark side of the world, he has garnered much admiration from people for what he is and his generosity. To leave the Syndicate to the next generation, he was planning on strengthening it. Although broad-minded, his ultimate goal was to find harmony in thought. After Graves death, he disappeared once, however met again with Grave as a different-looking monster due to Harry's conspiracy.
Somewhere in space, there is a planet about which little is known...its age, or even its exact location. On the planet sprawls a colossal city, in which every building snuggles up against a mysterious, lofty tower that towers over the center of the metropolis. People spend their lives divided into separate strata, seldom leaving their sections of the city.

The higher strata are occupied by a select elite, secluded from the majority of the population that lives in the lower layers. Under them lie the bottom strata, where not a day goes by without violence and bloodshed. Lower still, underneath everything, lie corpses from ages past...decaying, but still supporting the enormous city and those who live there.
